1877—ESTABLISHED 59 YEARS—1936

Good Luck with Maule's Seeds!

MORE THAN A MILLION PLANTERS IN THE U. S. A. KNOW THIS TOKEN

GOOD LUCK WITH MAULE'S SEEDS

WHEN IN DOUBT BUY VARIETIES MARKED WITH THE 4 LEAF CLOVER

To Our Friends and Customers:

Last year more than a million gardeners and farmers in all parts of America were using Maule's Seed Book. This book is the guide to successful gardening and farming.

The wonderful growth of the Maule seed business has been accomplished—not by luck—but by painstaking endeavors to keep abreast of the times, and render *real service* to our customers by supplying the highest quality seeds *Grown, Tested and Guaranteed* by Maule and at *Low Prices.*

Last summer we moved into new and larger quarters here in Philadelphia—4015 Clarissa Street. Now we can fill your orders even quicker than last year. Nearly every order will be shipped the same day it is received.

We have always tried to help our customers in every possible way. A striking example of this is Maule's Easy Payment Plan originated by us in 1933 and offered to our customers again this year—1936.

The use of our *Blue Order Blank* enables such of our customers as find themselves short of ready cash in the winter or early spring to *"Buy from Maule, and Pay Next Fall."* (See Maule's Easy Payment Plan below.)

Of course we are aware that cash is more available on many farms this year than was the case last year; and we also know that most of Maule's customers prefer to send cash with their orders, and will use the *Pink Order Blank.* But to those who for one reason or another, do not find themselves in a position to send the full amount with their orders, we again extend the privilege of using the *Blue Order Blank.*

So send in your full order for both Vegetable and Flower Seeds early this year, whichever method you may choose for payment.

For more than half a century our slogan has been, "Maule Seeds—Once Grown, Always Grown."

We Pay the Postage

Up to 10 lbs. of each kind of seeds in this book delivered free to your door or Post Office.

MAULE'S EASY PAYMENT PLAN

Would it help you to buy your seeds on time?

WE are glad to give Maule customers the privilege of getting all their seeds at once, but letting part of the payment go until they have received the first money from their crops, any time before September 1st. Last year thousands took advantage of this plan, and we treasure the many letters they have written to tell how much it helped.

Of course we know all Maule customers like to pay cash when they can—but we wanted to do something to help when cash has been so scarce on so many farms.

Pick out all the seeds you want, both vegetable and flower—write them down on the blue Easy Payment Order Blank and send us just half of the total cost with your order. Then pay the balance any time before September 1st. Now you can get twice as many seeds as you thought you could afford to plant.

We are not even charging interest, for Maule customers pay promptly. All we ask is that you make your order for over $4.00, and order early. **Use the Blue Order Blank to Get Your Seeds Now on Maule's Easy Payment Plan.**

GARDENERS EVERYWHERE LIKE MAULE'S SEEDS. THERE MUST BE A REASON

Hundreds of Unsolicited Testimonials Received every year. The following are selected at Random from our Files

C. W. Huff—Gridley, Calif. A copy of your 1934 catalog has been received. It is the finest ever and full of good things as an egg is of meat. Last winter I bought some Gladiolus bulbs from you. They arrived in good condition and I had splendid luck with them. Such Big, Lovely Blooms.

Jos. Rose—Seattle, Wash. I feel that you should know my utmost appreciation in regard to your wonderful seed I got from you last year. I sure do recommend the same to all my friends. I dare say your seed was about 100% fertile, and the flowers were just wonderful.

Mrs. Jas. M. Bagley—Alpharetta, Ga. You might be glad to know that I won the Sweepstakes prize at our flower show last fall, on a basket of Pompon Zinnias grown from your seed. About 50 contestants entered.

John Hanson—Jamestown, N. Y. Inclosed is a clipping taken from the Jamestown Post, regarding carrots which my son raised from "Maule's Goldinhart" carrot seed. These carrots were the best variety that I have ever raised. I have never seen such large, tender, uniform carrots. I will always recommend "Maule's" seeds to my friends.

James Bowen—Readsboro, Vt. Have used your seeds for quite a few years and would say "There are None Better at Any Price."

Mrs. Russell S. Doty—Fortville, Ind. We have used your seeds several times, and the best garden we ever had was the year we used your seeds exclusively.

Miss Margaret Perryman—Welcome, No. Car. It is a pleasure for me to recommend you to my friends. I've already started my list for spring order.

E. G. E. Reel—Excelsior, Minn. I overlooked this in my spring order which was, by the way, the *50th Annual Order* I have had of your seeds, with never a single cause for complaint. Some record for both of us!

Wm. E. Reed—Lawton, Okla. I think Maule's Earliest Tomato is the best eating, best quality, of all I ever tasted. The good people of U. S. will long remember the upright, honorable dealings of Wm. Henry Maule Co.

Mrs. Mary M. Kubiak—Strongsville, Ohio. Have bought seeds from you several times and believe me they are the best. Always had the finest results. They are full of life and practically every one germinates and produces a strong, healthy plant.

Maule's Best Radishes

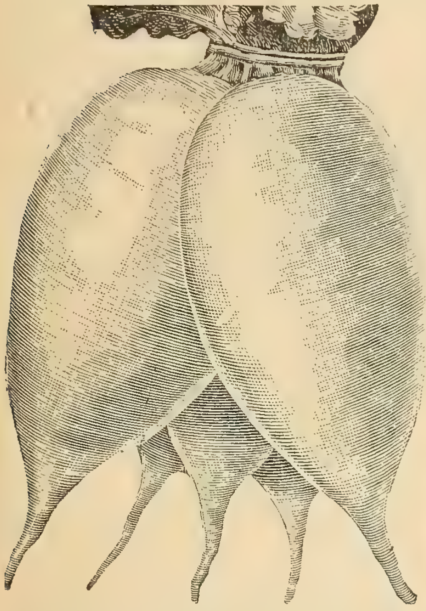
For Summer

Culture: **Summer Radishes** require a longer season to mature than the spring radishes. They are adapted for sowing early in the spring to mature during the summer; or they may be planted later to be ready for the table any time before frost. In hot dry weather radishes are apt to become pithy, owing to slow growth. This can be prevented by shading with lath screens. For a continuous supply sow every two weeks until September. One packet for 20 ft. of drill; 1 oz. for 100 ft.; 8 to 10 lbs. per acre.

For Winter

Culture: **Winter Radishes** require cool weather at the end of their growing season and for that reason they are planted during the summer. They thrive in a light, sandy soil of moderate fertility. Sow the seed ½ in. deep in rows spaced 15 to 24 in. apart any time during June, July, or early August. Thin the seedlings to stand 4 to 6 in. apart when they are large enough to be handled. Cultivate the crop frequently to preserve soil moisture and keep down the weeds. One packet will sow 20 ft. of row; 1 oz. 100 ft.; 8 to 10 lbs. per acre.

It is Necessary to Grow Radishes Rapidly for Firm, Smooth, Tender Roots



571 Maule's 1834

571 Maule's 1834 or All Year Round

A Radish Adapted to Every Season

(40 days) This high-bred, white summer radish is well-known under the name 1834. The skin is a beautiful ivory-white. It is thin and encloses the icy white flesh which is extremely crisp and brittle. The shape of this excellent radish is well shown in the illustration given above. Though 100 years old, it is still a leading quality variety. **Pkt. 10c; oz. 15c; ¼ lb. 40c; ½ lb. 60c; lb. $1.00; 2 lbs. $1.85; 5 lbs. $4.40; 10 lbs. $8.00.**

593 White Strassburg

A Popular White Summer Variety

(40 days) A handsome, white radish of oblong shape and large size, broad at the shoulder and gradually tapering toward a fine thin tap-root. Both the skin and the flesh are pure white. The roots grow 4 to 5 in. long and are 3 in. thick at the shoulder. The flesh is crisp, tender, and of an icy, transparent texture. Keeps in excellent condition for a long time. **Pkt. 10c; oz. 15c; ¼ lb. 30c; ½ lb. 50c; lb. 80c; 2 lbs. $1.45; 5 lbs. $3.40; 10 lbs. $6.00.**

604 Japanese Colossal

(80 days) A beautiful large winter radish of attractive appearance. The roots grow to truly enormous size, yet they are tender, crisp, and delicious. The shape of the roots is oval. Both flesh and skin are pure white. Retains its crisp, choice flavor for a long time. **Pkt. 10c; oz. 15c; ¼ lb. 45c; ½ lb. 70c; lb. $1.15; 2 lbs. $2.10; 5 lbs. $5.05; 10 lbs. $9.20.**

605 Long Black Spanish

(70 days) Long, smooth radishes with black skin and pure white fine-grained solid flesh. The flesh of this variety is solid and will therefore, keep way into spring. The roots grow 8 to 9 in. long and 2½ in. thick. **Pkt. 10c; oz. 15c; ¼ lb. 40c; ½ lb. 60c; lb. 90c; 2 lbs. $1.60; 5 lbs. $3.80; 10 lbs. $6.75.**

581 Maule's Improved Long Scarlet Short Top

Smooth, Tender, Uniform Roots of Bright Carmine-Red Color

(30 days) A splendid and most attractive long spring radish of finest quality. A standard variety and a great favorite with those preferring long radishes, growing about six inches long. The roots are thick and hold their shape well until they abruptly end in a fine tap-root. The thin and tender skin is a beautiful deep carmine-red blending into white at the tip. The flesh is pure white, crisp, and juicy. The flavor is delightfully pungent, and we consider this the best of the long red radishes for both market and home garden. **Pkt. 10c; oz. 15c; ¼ lb. 30c; ½ lb. 45c; lb. 75c; 2 lbs. $1.35; 5 lbs. $3.20; 10 lbs. $5.60.**

The Most Uniform, Deepest Red Beet in Existence. Tender, Productive, and Exceedingly Sweet

(50 days) This Beet is miles ahead of any other variety ever offered anywhere. It is an early variety with a rich, dark red skin and short tops. The uniformity in size and shape is truly remarkable. They are perfectly globe shaped and always smooth. The flesh is deep red with hardly any zone. It retains the deep red color when cooked. Early Maturing; Heavy Yielder; Firm Sweet Dark Red Flesh

(40 days) No other Beet can replace this well established variety for earliness. Under favorable conditions the roots grow quickly and reach full size in an astonishingly short time. As the roots are of medium size and have only a limited amount of foliage, they can stand quite close planting which, in turn, means increased yields from the land available. The compactness of the plant is only one of the features that has made it valuable for growing under glass. Its quality, attractiveness, uniformity, and the dark red color of the flesh are characteristics that will appeal to many gardeners. Cooks sweet, tender, and crisp, retaining its bright red color nicely and is very desirable for pickling. **Pkt. 10c; oz. 15c; ¼ lb. 40c; ½ lb. 60c; lb. $1.00; 2 lbs. $1.85; 5 lbs. $4.40; 10 lbs. $8.00.**

77 Crosby's Egyptian

Medium Size Tops, Roots Flattened Globe Shape
Flesh Deep Red, Zoned Lighter

(**42 days**) Our strain of this quality Beet is a decided improvement on the older forms of Egyptian and we claim there is no better early garden Beet, as it increases in size so rapidly. The roots are larger and more globular though still somewhat flattened at the top, representing more or less of a turnip shape. The skin is a very deep red and the flesh is somewhat lighter in color. The foliage is medium size so that by close planting the yield from a given area can be considerably increased. Market gardeners will find this an ideal variety for bunching. **Pkt. 10c; oz. 15c; ¼ lb. 40c; ½ lb. 60c; lb. 90c; 2 lbs. $1.60; 5 lbs. $3.80; 10 lbs. $6.75.**

72 Ohio Canner

Blood-Red Flesh with Few Zones. Retains its Color After Canning

(**60 days**) This variety has been improved principally for the purpose of canning by the Ohio Agricultural Experiment Station to evolve a Beet that would meet the wants of the Canners, and the result has been received with great enthusiasm. It is also a most valuable variety for home gardeners and market growers who cater to a select market. The shape of the Beets is round or slightly flattened. The foliage is reddish green and somewhat smaller than that of Detroit Dark Red. The very dark red skin is exceptionally smooth. The color of the flesh is the darkest of any of this type showing hardly any zones at all. This is a Beet that will remain tender and sweet all summer and well into the late fall. Whether young or old, small or large, they are always tender and sweet. **Pkt. 10c; oz. 15c; ¼ lb. 45c; ½ lb. 65c; lb. $1.05; 2 lbs. $1.95; 5 lbs. $4.60; 10 lbs. $8.40.**

(**40 days**) We regard this as an exceptionally fine Beet with large roots of even size and splendid quality. Its shape is that of a turnip; just a little deeper than Crosby's Egyptian. The flesh is dark crimson with slightly lighter zones or rings. As the top growth is medium size it stands close planting very well. Its attractiveness and earliness have made it a great favorite with many. It is undoubtedly one of the best Market Beets. When cooked it has a rich sweet flavor and it is entirely free from any fiber or toughness. Equally fine for immediate use or for canning. **Pkt. 10c; oz. 20c; ¼ lb. 50c; ½ lb. 75c; lb. $1.25; 2 lbs. $2.30; 5 lbs. $5.50; 10 lbs. $10.00.**

70 Maule's Early Wonder

Also Known as Boston Crosby. Early, Tender and Sweet; Dark Red Roots

(**40 days**) This early Beet is the result of yearly selection made over a long period of time. As we offer it today it seems almost impossible to still further improve its appearance and excellent quality. It is probably the earliest of the small table beets for outside growing. The roots are flat to globe in shape, of a beautiful deep red color, and of medium size roots and tops. This characteristic makes it possible to grow them quite close and thereby increase the yield. Its most valuable points are—that it is two weeks earlier than any other market Beet, and that the roots mature all together; thus allowing the harvesting of the entire crop at one time. Equally desirable for home garden planting as for market. **Pkt. 10c; oz. 15c; ¼ lb. 40c; ½ lb. 60c; lb. 95c; 2 lbs. $1.70; 5 lbs. $4.05; 10 lbs. $7.10.**

Maule's Quality Cauliflower

Culture: For extra early Cauliflower start the seed of the early, quick maturing varieties in the fall in a cold frame or in early spring in a hotbed. When large enough, transplant to the garden or field. For a main crop, to harvest during summer and autumn, sow the seed in May or early June. One packet will produce about 150 plants, one ounce about 3000 plants. Four ounces are required for one acre. When transplanting, set the plants 2 to 3 ft. apart each way.

164 Maule's Prize Earliest

The Earliest, Largest, and Surest Header

(90 days) We consider this the earliest, finest, and most attractive cauliflower. Every plant produces a head. It is a sure header whether planted for forcing in frames or grown outdoors for either early or late crop. The heads mature all at about the same time. The growth of the plants is dwarf and compact so that the plants can be set as close as 18 in. apart in the frame or field. Such close planting naturally means a greatly increased yield from a given space of ground. It is particularly desirable for forcing under glass. The compact, perfectly white, closely formed heads are most attractive and are sure to bring a high price in the market. No one who has had experience with Maule's Prize Earliest is likely to grow any other for the early market. When the seed is sown under glass in February and transplanted after danger of frost is over, perfect heads are produced in the early days of June. **Pkt. 25c; ¼ oz. 90c; ½ oz. $1.50; oz. $2.70; ¼ lb. $8.10; ½ lb. $14.85; lb. $27.00.**

170 Super Snowball

Beautiful, Snow White, Solid Heads

(90 days) One of the earliest varieties and remarkable for its uniformity of size, shape, and type. Under favorable growing conditions, every plant will produce a head. It heads so evenly that the entire crop may be harvested within a short time after it begins to mature. The plants are vigorous and the erect leaves quite large and curl over the heads protecting them from the sun. The large heads are pure white, solid, and very firm. In most of the states probably the best crop is raised from seed sown about the middle of May and transplanted in July, allowing the plants to make their growth during a cool period which is undoubtedly the best for raising cauliflower. **Pkt. 25c; ¼ oz. $1.00; ½ oz. $1.75; oz. $3.00; ¼ lb. $9.00; ½ lb. $16.50; lb. $30.00.**

Maule's Blue Ribbon Celery

Culture: Sow the seed thinly any time from March 1 on, in either boxes, cold frames, or in a specially prepared bed. Cover thinly but firmly with fine soil. Keep evenly and moderately moist until the seeds sprout. One packet of seed will provide about 400 plants; one oz. will give 7500 plants. Four ounces of seed are needed for an acre. Keep the plants growing vigorously at all times, and transplant in rows spaced 4 ft. apart allowing about 6 in. between the plants in the row. For a late fall crop and winter storing sow the seed in the open early in the spring when the ground can be prepared. Celery requires ample animal fertilizer and humus, and moisture for good growth. It does best on muck soil due to its moisture retentive quality.

Maule's Yellow Sweet Corn

Culture: Plant the seed after all danger of frost is over and the ground has warmed up. Plant in rows 3 to 4 ft. apart. Cover the seeds about one inch deep. Space the seed 8 in. apart in the rows. The most popular method, however, for field planting is to drop 3 to 4 seeds in hills spaced either 3 by 4 ft. or 4 by 4 ft. Allow 2 to 3 plants to remain in each hill. In order to provide a continuous supply of good fresh corn, make succession plantings until about July 10. The final date of planting, of course, depends entirely upon your climatic condition. A packet of seed will plant four rows, each 25 ft. long; ½ lb. for 200 hills; 12½ lbs. per acre.

213 Barden's Wonder Bantam

227 Golden Sunshine

The 10 to 12 Rowed Golden Bantam. Early and Sweet

(55 days) Every sweet corn grower should try this remarkable early variety. Its earliness alone is a factor that should appeal to everyone whether he grows sweet corn for market or for home use. Its limited habit of growth, the plants are only 5 to 5½ ft. tall, makes it possible to grow the rows closely together and therefore increase the yield from a given area. Most plants produce two perfectly-formed large ears about 6½ to 7 in. in length. There are 10 to 12 rows of bright yellow, sweet grains to the ear. **Pkt. 10c; ½ lb. 25c; lb. 40c; 2 lbs. 70c; 5 lbs. $1.30; 10 lbs. $2.40, postpaid.** Not prepaid: 15 lbs. $2.70; 25 lbs. $4.25; 50 lbs. $8.00; 100 lbs. $15.00.

The stalks grow 6 to 7 ft. tall, producing 2 to 3 good ears. The ears grow 7 to 8 in. long with 12 to 14 rows of even kernels. An excellent variety for the home or market garden. **Pkt. 10c; ½ lb. 25c; lb. 35c; 2 lbs. 55c; 5 lbs. $1.15; 10 lbs. $2.05, postpaid.** Not prepaid: 15 lbs. $2.25; 25 lbs. $3.50; 50 lbs. $6.50; 100 lbs. $12.00.

Pure White Grains; Extremely Hardy

(55 days) In this early corn we have produced a variety that stands alone for the extra early market. The 7 to 8 in. ears have 12 rows of pure white, attractive grains which almost equal in sweetness to a true Sugar variety. Because of its extreme hardiness it can be planted much earlier than any true Sugar Corn. It adapts itself to any kind of soil. **Pkt. 10c; ½ lb. 25c; lb. 35c; 2 lbs. 55c; 5 lbs. $1.15; 10 lbs. $2.05, postpaid.** Not prepaid: 15 lbs. $2.25; 25 lbs. $3.50; 50 lbs. $6.50; 100 lbs. $12.00.

The stalks 5 ft. tall, bear more ears than any other early sweet corn. It is especially desirable for gardeners who wish to benefit from the high prices obtained by being the first in the market, and it is a great boon to the home gardener, supplying his table with true sugar sweet corn in such a short growing period. **Pkt. 10c; ½ lb. 25c; lb. 40c; 2 lbs. 75c; 5 lbs. $1.35; 10 lbs. $2.50, postpaid.** Not prepaid: 15 lbs. $2.85; 25 lbs. $4.50; 50 lbs. $8.50; 100 lbs. $16.00.

205 Maule's Colossal Early

We Claim That This Is The Finest Large Eared Sugar Corn In Existence

(70 days) When a variety of Sweet Corn not only holds its own for a period of over 22 years but its sales increase with every season, it simply must be good. While its days to mature have been given above as 70, we know of many instances where it has produced its first ears within 58 to 62 days after planting. Quality in Sweet Corn is, however, more important for its popularity than season of maturity. The ears are 7 to 9 in. long and frequently 2 to 3 in. thick, with 12 or 14 rows of large sweet kernels that fairly melt in your mouth. The stalks are 6 to 7 ft. tall, many of them carrying 2 to 3 ears on a stalk. **Pkt. 15c; ½ lb. 25c; lb. 45c; 2 lbs. 85c; 5 lbs. $1.55; 10 lbs. $2.90, postpaid.** Not prepaid: 15 lbs. $3.45; 25 lbs. $5.50; 50 lbs. $10.50; 100 lbs. $20.00.

(68 days) This is one of our great specialties and we have carefully guarded its outstanding qualities to protect growers in getting, year after year, a corn of the same high quality. Even after the time when it is at its best has passed, it still is as sweet and tender as many other varieties when at their height of perfection. 216 Country Gentleman

Long and Slender White Grains of Unusual Nectar-Like Sweetness, Fairly Melting in the Mouth

(80 days) The variety is easily recognized by the irregular arrangement of the kernels. The seeds also are quite distinct. The ears are quite large, 7 to 8 in. long, with a small white cob thickly covered with long, slender, white grains of exceptional sweetness, and it remains "in the milk" longer than any other Sweet Corn. Country Gentleman has become famous all over the United States for its nectar-like sweetness; and is the joy of epicures everywhere. The stalks grow 7 ft., often carry as many as three ears which makes this variety a heavy yielder. Splendid for home, market, and canning. It is rather slow in maturing, but is in perfection just after the early varieties. **Pkt. 10c; ½ lb. 25c; lb. 35c; 2 lbs. 55c; 5 lbs. $1.15; 10 lbs. $2.05, postpaid.** Not prepaid: 15 lbs. $2.25; 25 lbs. $3.50; 50 lbs. $6.50; 100 lbs. $12.00.

222 Maule's "Lead All" Evergreen

A Most Productive Late Type of Evergreen Sweet Corn; Extra-Large Size Ears of Superb Quality

(85 days) In introducing this corn some years ago we realized that increased size linked with superior quality were most important features that would appeal to home gardeners and market growers. Maule's "Lead All" Evergreen combines extra-large size with the superb quality found in other sweet corns of the Evergreen type. It produces truly handsome ears which are sweeter and larger than either Country Gentleman or Stowell's Evergreen. The stalks grow 8 to 9 ft. tall, an indication of their vigorous habit and productiveness. Most of the plants produce two fine well-developed ears measuring anywhere from 8 to 10 in. in length. They are thick and heavy, closely set with 16 or 18 rows of large, white, sweet grains. Noted for its drought-resistant qualities. Retains its fine flavor better than most other varieties. **Pkt. 15c; ½ lb. 25c; lb. 45c; 2 lbs. 85c; 5 lbs. $1.55; 10 lbs. $2.90, postpaid.** Not prepaid: 15 lbs. $3.45; 25 lbs. $5.50; 50 lbs. $10.50; 100 lbs. $20.00.

The stalks make a strong, upright growth supported by an abundance of roots which give good stability to the plants. While ears 10 in. long are considered already very large, Maule's Improved Giant often produces ears which measure as much as 12 in. in length with 14 or 16 rows of luscious white kernels on stalks 8 to 10 ft. **Pkt. 10c; ½ lb. 25c; lb. 40c; 2 lbs. 75c; 5 lbs. $1.45; 10 lbs. $2.70, postpaid.** Not prepaid: 15 lbs. $3.15; 25 lbs. $5.00; 50 lbs. $9.50; 100 lbs. $18.00.

Maule's Famous Tomatoes

Ready for Use in 85 to 90 Days

We Offer a More Extensive and Up-to-Date List of Tomatoes than Other Seed Houses

Tomatoes abound in vitamins, no other fruit contains greater health-giving elements Every garden should have an early as well as a main or general crop of tomatoes. Either for market or home use, the idea of growing early tomatoes is to get them as soon as possible and follow up with the main crop, which may be used in many ways and are especially desirable for canning. Do not plant in overrich soil as it will cause an overgrowth of foliage and few fruits.

Culture: Sow the seed in February or March in a hot bed, greenhouse or in shallow boxes in the house in rows 4 to 6 inches apart and half an inch deep. When the plants are about 2 inches high transplant to 3-inch pots or into shallow boxes 4 inches apart each way. Transplant in the open ground, after all danger of frost is past, 3 to 4 feet apart each way. Usually the plants are ready for their permanent location about six weeks after the seed is sown. Cultivate frequently. A packet will produce about 300 plants, an ounce about 3,500 plants, enough for an acre.

Maule's Famous Lawn Grass Mixtures

Lawn Sown with Maule's "Extra Quality" Lawn Grass Seed Mixture

ABOUT LAWNS There is no doubt that an expanse of well-kept lawn surrounding a house does give it an air of well-being and prosperity, highly attractive to all who pass by. A good lawn adds much to the value of any property. Proof of this can be had by taking a walk or ride about the suburbs of any town; or into the real country beyond. It will be observed that the most attractive dwellings whether suburban or farm, are those with a setting of green grass.

In making a lawn it should always be kept in mind that it is a permanent piece of work which will endure in all its pristine beauty for twenty years or more. Therefore, be careful as to the source of the seeds you sow. Avoid the use of cheap grass seeds or hay-loft sweepings; because once these are on your land you will have stored up trouble for years to come, because complete eradication of such weeds is practically impossible. Also it should be remembered that the cost of the seed for a lawn is a small part of the total expense of the work; and unless the best of seed is used all your labor is thrown away.

891 Maule's "Extra Quality" Lawn Grass Seed Mixture

This mixture is the result of years of experiment and study, and is unsurpassed for producing a velvety green deep-rooted sod, that will be permanent and present a good appearance spring, summer and fall. It is made up of grasses that are at their best at different periods and thus a lasting and permanent effect is obtained. It is entirely free from grasses that form clumps. A small proportion of White Dutch Clover has been included in the mixture because it thickens the sod and grows well with the finer grasses. **½ lb. 25c; lb. 45c; 2 lbs. 85c; 5 lbs. $1.80; 10 lbs. $3.35, postpaid.** Not prepaid: 15 lbs. $4.20; 25 lbs. $6.75; 50 lbs. $13.00; 100 lbs. $25.00; 250 lbs. $57.50; 500 lbs. $100.00.

884 Quick Results Lawn Grass Seed Mixture

A Rapid Growing, Velvety Grass

We recommend this mixture to all gardeners who want a beautiful effect in the shortest time possible. Besides the grasses which are suited for this purpose, we have included enough seed of others to insure permanent results. You may expect to cut your lawn for the first time about 2 weeks earlier from this than from any other grass seed mixture. It is particularly adapted for late spring and summer sowing. **½ lb. 20c; lb. 35c; 2 lbs. 65c; 5 lbs. $1.55; 10 lbs. $2.85, postpaid.** Not prepaid: 15 lbs. $3.45; 25 lbs. $5.50; 50 lbs. $10.50; 100 lbs. $20.00; 250 lbs. $47.50; 500 lbs. $90.00.

797 White Dutch Clover

Gardeners who prefer an extra-heavy growth of clover in their lawn should add this at the rate of 4 ounces to every 2 pounds of grass seed. Sow separately in order to effect an even distribution as clover seed is much heavier than grass seed. **¼ lb. 25c; lb. 60c; 2 lbs. $1.15; 5 lbs. $2.75; 10 lbs. $4.85, post paid.** Not prepaid: 15 lbs. $6.45; 25 lbs. $10.50; 50 lbs. $20.50; 100 lbs. $40.00.

885 Maule's "Shady Lawn" Grass Seed Mixture

Flourishes under Trees or in Shady Nooks

Nothing spoils the good effect of a lawn more than bare spots in shaded corners, or under trees. Using this grass mixture will help you to do away with these unsightly spots as the grasses in this mixture are naturally adapted for growing in semi-shaded positions. Proper preparation of the soil, an ample supply of plant food, and regular watering may be needed if rain does not reach the shaded spots in abundance. **½ lb. 35c; lb. 60c; 2 lbs. $1.15; 5 lbs. $2.75; 10 lbs. $5.25, postpaid.** Not prepaid: 15 lbs. $7.25; 25 lbs. $11.75; 50 lbs. $23.00; 100 lbs. $45.00; 250 lbs. $110.00; 500 lbs. $215.00.

887 Maule's "Sunny South" Grass Seed Mixture

Especially Suited to Hot Climates

The "Sunny South" mixture is adapted to our southern states where the ordinary lawn grass mixtures will not succeed sufficiently well to provide an even, smooth, rich green lawn. It contains southern grasses that will give a good sod even during the hot summer weather provided the lawn is watered liberally. **½ lb. 20c; lb. 35c; 2 lbs. 65c; 5 lbs. $1.55; 10 lbs. $2.90, postpaid.** Not prepaid: 15 lbs. $3.45; 25 lbs. $5.50; 50 lbs. $10.50; 100 lbs. $20.00; 250 lbs. $47.50; 500 lbs. $90.00.

886 Maule's "Steep Slope" Lawn Grass Seed Mixture

Especially Adapted for Embankments and Terraces

This mixture is made up of grasses that are deep rooting to hold soil in place on slopes, embankments, etc. It contains only typical lawn grasses which have long, spreading root growth and will withstand considerable heat and dry weather. To prevent washing after the seed is sown, cover the bank with burlap or cloth until the young seedlings have taken hold of the soil. **½ lb. 30c; lb. 50c; 2 lbs. 90c; 5 lbs. $2.10; 10 lbs. $3.85, postpaid.** Not prepaid: 15 lbs. $5.00; 25 lbs. $8.00; 50 lbs. $15.50; 100 lbs. $30.00; 250 lbs. $70.00; 500 lbs. $125.00.

Wilt-Resistant Asters are supplied wherever they are Available

Modern plant wizards have given us Asters resistant to the destructive Wilt disease. These Wilt-Resistant Asters have proved so valuable, that Maule offers all that have so far been bred and will add more as they are developed.

Asters are Easy to Grow Asters bloom from three to five months after seed is sown, varying with the variety and the climate. By starting the seed indoors, 6 weeks before outdoor planting time, earlier blooms may be had. Give your Asters rich, well-drained soil, plenty of moisture and sunshine, and they will repay you. Every year the location of the Aster bed should be changed.

An Exhibition Dahlia

Dahlias from Seed

It requires only about 2 weeks longer for Dahlias to flower from seed than from tubers. The seed should be started in boxes just as with choice annuals or early vegetables, and the little plants set out when the weather warms up. Dahlia seed seldom produces flowers just like the parents—so one can never be certain what his flowers will look like, their color, etc. There is always possibility of raising some fine new Dahlia—as many amateurs have done. Quality, however, is passed on to the offspring—so plant only the best Dahlia seed.

1275 **Double Cactus Dahlias, Mixed** Twisted, pointed petals **Pkt. 20c; 1/16 oz. 55c.**

1277 **Decorative Dahlias, Mixed** Massive blooms, many colors. **Pkt. 15; 1/16 oz. 40c.**

Delphinium—*The Gardener's Pride*

Hardy Larkspur. (*Perennial*) Flower lovers always want to raise the finest spikes of this most beautiful of perennials. While the soil and the culture given the plants influences the kind of flowers grown, so also does the seed. Maule offers here some wonderful strains of Delphinium seed to help Maule customers grow the very finest.

Maule's Mammoth Prize Exhibition Strain Delphinium

Marvelous varieties, Delphinium with spikes 4 to 6 feet tall, these spikes thickly set with double, semi-double, or single blooms. Remember that it does not take large estates or English gardeners to grow fine Delphinium—prize Delphinium is frequently grown in the farm garden—but the seed must be of the best.

1297 **Art Shades** So-called because the florets are an artistic combination of blue with pink suffusion.

1298 **Deep Blue Shades** Deep blue, purplish blue, indigo-blue, etc.

1299 **Light Blue Shades** All the lighter and pale shades of blue.

Any one of the three separate color mixtures:

Maule's Improved Larkspur

Grows as Easily as a Weed—Makes a Wonaerful Show
Is Fine to Cut

These Larkspurs are vastly improved—long spikes, very double flowers, colors superbly rich and lovely. Few flowers are more effective in the garden especially when several colors are planted close together. Larkspur, though not very long-lasting, is one of our prettiest cut flowers and a favorite with the florist. It grows quickly from seed sown outdoors in early spring, or the seed may be fall-sown. Larkspur does well in a sunny place, and in almost any soil that is fairly dry. The plants bloom for a long time if the faded blooms are kept cut. Blue Bell is a new Larkspur of especial beauty.

Tall Branching Double Stock-Flowered

Long spikes thickly set with double flowers, and branching off the main stem. The plants grow 3 or 4 ft. tall in a favorable location, and bloom freely.

1495 **Azure-Blue** Soft ageratum blue. Plant this variety with a pink like La France for contrast.

1421 **Carmine** (*Newport Pink*) A warm, and brilliant color—rich carmine, handsome and showy in the garden or when cut.

1496 **Dark Blue** (*Purple*) Deep, very rich color.

1497 **Lilac Improved** Tall thick spikes of double, soft pinkish lilac flowers. This color is a favorite.

1426 **Rose** Massive spikes of rich rose.

1422 **Sky Blue** Large, double, pale blue flowers in perfect long spikes. An unusual variety.

For Quality and Size of Bloom

For many, many years, Maule has specialized in Pansies—and Maule Pansies are today grown all over the world by those who want the very best. In recent years this best loved of all flowers has been wonderfully improved. Varieties like Oregon Giants, huge, long-stemmed, and brightly colored, have been developed.

Growing Pansies for Profits

Very few city or small town yards but show at least a few Pansies in the Spring. Pansy plants are so popular, they are almost assured of a market. They are easy to grow too. Why not plan to grow this most profitable flower for sale next Spring?

For sale of the plants in the Spring sow Pansy Seed in late July and August, choosing a partially shaded place, and deeply prepared, well pulverized soil. The seed bed must be kept moderately moist at all times. Covering it with paper or cloth until the seed germinates will help. Transplant the seedlings, when they are large enough to handle, into well enriched soil, setting them 8 in. apart. Pansies are hardy and will live over winter without a frame. Mulch the plants with straw, hay, or leaves after the ground has frozen.

Remember that the Pansy plants with the largest flowers command the highest prices, so select a large flowering variety. You cannot go wrong with Maule's Pansies.

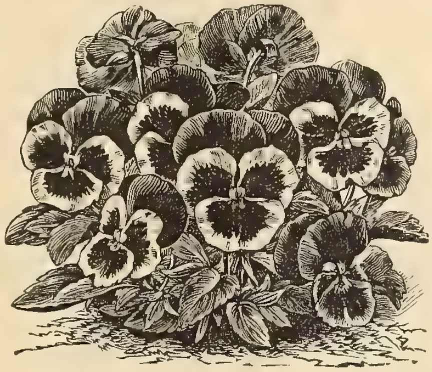
From 4,000 to 8,000 Pansy plants will be had from an ounce of the seed. Maule's leaflet "How to Grow Pansies," is free for the asking.

1610 Swiss Giants Mixed

When first offered a few years ago these richly colored Pansies created a sensation, but today they are even lovelier from constant selection and careful breeding. The blooms are extremely large. They are quite round, and crinkled and fluted in a most artistic manner. The colors have especial depth and richness, and there is a predominance of fine red shades. The flowers are marked with blotches of deeper contrasting color. The Swiss Giants are hard to beat for color. **Pkt. 25c; 1/16 oz. 60c; ⅛ oz. $1.00.**

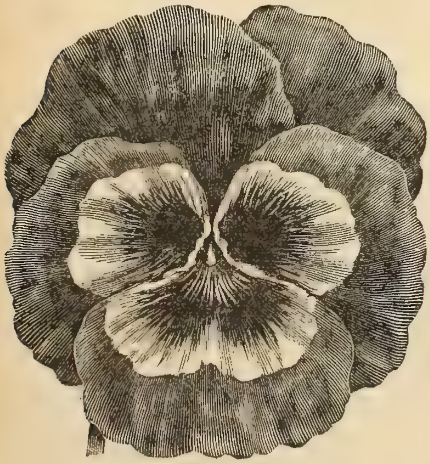
1634 Extra Fine Mixed

A very good, very carefully made mixture of fine Pansies. Not the largest-flowering, these Pansies have blooms of good size and the mixture was composed from many separate colors to assure its being especially brilliant. Maule customers know that for bedding, where a mass of bloom is desired, this is a splendid mixture to plant. It is showy and provides many cut flowers. **Pkt. 10c; ⅛ oz. 30c; ¼ oz. 50c.**



1614 Maule's Prize Mixed Giant Pansies

An endless variety of the most beautiful colors, the largest flowers. Is it any wonder that this is the most popular Pansy Mixture of which we know? It exhibits the greatest diversity of colors, in the most beautiful soft and deep rich shades. There are the finest self-colors including white, yellow, pink, rose, blue, purple, and the rare and desirable red shades. Some of the Pansies are veined and bordered with contrasting colors, while others have clearly defined mahogany-brown, black or purple eyes. Some are wide and flaring, while others are attractively waved. They are large, 2½ to 3 in. in diameter; of perfect form, heavy substance, and very long-stemmed. **Pkt. 25c; 1/16 oz. 80c; ⅛ oz. $1.50.**



1600
Maule's Giant Phenomenal Mixture of Pansies

Again this Phenomenal Mixture is cordially recommended to Maule customers. Though it was introduced to the American public years ago, it has been constantly improved upon. Originating in France, this mixture consists of the largest, choicest, and most "phenomenal" of Pansies. It is especially rich in Pansies of the ruffled type, and there are many and varied colors and color combinations. The presence of many Pansies of those wine-red shades so rare among flowers has endeared it to many Maule customers. Every order should include it. **Pkt. 15c; 1/16 oz. 35c; ⅛ oz. 65c.**

Giant Pansies in Separate Colors

Trimardeau Varieties Excellent Pansies for bedding and edging where separate colors are desired. These Pansies are popular for their compact, neat habit of growth, for their large flowers which have long, stiff stems. The neat little 6 in. plants are free-blooming and very hardy.

1623 Golden Yellow Pure golden yellow without the faintest trace of markings of any kind. Pretty with other colors.

1594 Oregon Giants

Pansies native to Oregon, and they are the largest in size of all—well-grown flowers measuring 4 in. across! A gracefully waved edge adds to the charm of these giant flowers, which otherwise are more flattened than other Pansies. Quite as fine a characteristic as the size of these Pansies, is their extra-long stems. Those planning to grow Pansies for market might well select this, for the flowers from them are of unrivalled size, sure to attract customers and warrant asking a higher price for the plants. Colors range from white to richest purple. **Pkt. 35c; 1/16 oz. $1.00; ⅛ oz. $1.75.**

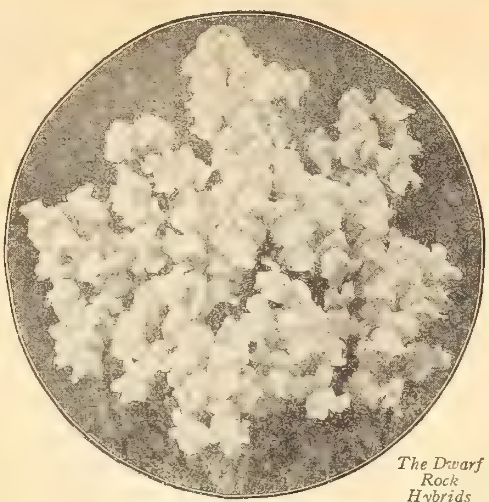
Maule's Snapdragons

Choice Antirrhinums
Improved in Size and Color

Though Snapdragons have been grown and prized for years, the recent introduction of new and finer types and varieties, makes them more than ever desirable. Snapdragons are most satisfactory garden flowers requiring only ordinary well-drained soil, and will do well in either sun or semi-shade. The plants are usually started indoors in March; or the seed may be sown outside when frost danger has passed to begin flowering in July. Snapdragon plants may, with protection, often be carried over winter.



The Dwarf Rock Hybrids

Dwarf Snapdragons
952 Rock Hybrids

The plants are quite small, only 8 in. high, but they are compact-growing. So ideally suited are they for Rock Garden planting, that they are called "Rock Hybrids," but they are just as useful for edging and potting. The little plants quickly reach flowering size and bloom continuously for some time. The flowers are mostly light colored and each little plant bears many spikes of bloom. **Pkt. 20c; 1/16 oz. 50c; ⅛ oz. 85c.**

New—Rustproof Snapdragons—*New*

950 Mixture of Colors Almost everyone who has ever grown Snapdragons has noticed the ugly dusty brown fungus that sometimes mars the foliage and often the flowers and buds. It is the rust disease, and frequently causes death of the plants. In California these Rustproof Snapdragons, which are 75 to 100% resistant to the rust disease, were developed. They have flower spikes just like the other varieties, and planting Rustproof Snapdragons practically assures plenty of healthy plants with fine blooms. Both home gardeners and greenhouse men will profit from growing Rustproof Snapdragons. **Pkt. 30c; 1/32 oz. $1.10; 1/16 oz. $2.00.**

Maximum Tall Giant Snapdragons

Antirrhinum Maximum

Biggest Snapdragons: The tallest spikes and the largest flowers. First offered to Maule customers about a decade ago, we find this today much the most popular of all Snapdragons. Little wonder too, for the colors are so good, and the original Maximum has been so improved by careful plant selection with only the very choicest types for seed. These Maximum Snapdragons grow 2-3 ft. tall outdoors, or 5 to 6 ft. in the greenhouse! To keep the plants in constant production of the big spikes, they should be cut and not allowed to form seed. A wider range of colors is offered in the Maximum than may be had in any other class. Fine for beds and borders and excellent to cut.

938 Orchid Mauve-lavender with a slightly deeper tube. Attractive when combined with yellow or pink.

951 Ruby Deep glowing ruby-red with a velvety finish. The tube is shaded with deep purple-carmine. Thick, striking spikes.

Salvia or Flowering Sage

All Salvias are of easy growth, succeeding in fairly rich, well-drained garden loam. Plants are usually started in early spring indoors or in the hotbed. The brilliant Scarlet Sage is indispensable for bedding. Blue Sage, not closely resembling the Scarlet, is just as attractive and its color and form adapt it to much wider usage. Sky Rocket is a dwarf, and the most brilliant little scarlet-flowering Salvia that may be imagined.

Scarlet Sage

For beds and borders. It brings vivid color to gardens in summer and fall.

1722 Drooping Spikes The extra-long spikes bend with the weight of their heavy load of flowers. In color these flowers are brilliant scarlet and the 2½ ft. tall plants are very graceful. **Pkt. 10c; ⅛ oz. 50c; ¼ oz. 90c.**

1723 Bonfire Well-rounded, dark-foliaged, sturdy bushes of even height with long stately spikes of scarlet-red carried well above. 2 ft. tall. **Pkt. 10c; ⅛ oz. 40c; ¼ oz. 70c.**

1724 America or Globe of Fire Very early, very free-blooming. The flowers are scarlet-red; the plants 15 in. **Pkt. 10c; ⅛ oz. 50c; ¼ oz. 90c.**

1726 Scarlet Bedder A valuable bedding variety, for it makes plants that are just 12 in. tall. These plants are neatly rounded, quite compact with showy, stocky flower spikes of rich scarlet. **Pkt. 10c; ⅛ oz. 50c; ¼ oz. 90c.**

1729 Sky Rocket (*Rakete*) The most dwarf of the Scarlet Sages—its little plants just 10 in. tall, are of such even height that they are ideal for bedding and edging. They are very sturdy and upright in habit, with thick spikes of brilliant scarlet. **Pkt. 30c; ⅛ oz. 85c; ¼ oz. $1.50.**

1733 Mixture, All Colors A mixture of Scarlet Sage, and Sages of other colors which are of the same growth habit. There are pink, salmon, carmine, purple, and even white. Just enough of each is included to make a showy mixture. **Pkt. 10c; ⅛ oz. 50c; ¼ oz. 90c.**

SCARLET SAGE

Blue Sage

All three Blue Sages offered here are perennials in the South, but the Farinacea varieties will not live over cold northern winters. All three come quickly from seed.

1727 Farinacea (*Mealy Sage*) Thin wiry flower stems in profusion with pale blue flowers. Both stem and calyx appear as if frosted to silvery-blueness. Desirable for show in the border, and for cut flowers throughout the season. 2½ ft. to 3 ft. tall. **Pkt. 10c; ⅛ oz. 40c.**

1725 Farinacea, Blue Bedder New, with floral stems a bit shorter, flowers darker blue, and stems and calyx of violet-white. 2½ ft. **Pkt. 15c; ⅛ oz. 40c.**

1728 Azurea grandiflora (*Perennial*) Spikes of sky-blue flowers borne freely in August and September. 3 ft. **Pkt. 10c; ⅛ oz. 40c.**

Giant Ruffled Varieties

Giant in size, and appearing even larger than they are and almost double because of the ruffling and frilling of the petals, the Giant Ruffled are the newest, the most beautiful of all Sweet Peas. Having greatest daintiness and charm the giant, fragrant flowers are produced mostly in fours on long, sturdy stems. They are as easily grown as the more familiar Spencer varieties.

1919 Mixture
Gaint Ruffled Sweet Peas

There are eight Ruffled Sweet Peas described below, and these as well as seedlings—Ruffled varieties in other colors which cannot yet be offered separately—are all included in this wonderfully blended and colorful mixture. A planting of this mixture is always a delightful experience. **Pkt. 15c; ½ oz. 30c; oz. 50c.**

1805 **Lady Ruffles** Graceful flowers, with warm pink color on a white ground. The pink extends well down to the base of the wings.

1907 **Ruffled Carmine** Bright but soft and pleasing carmine-rose. The perfectly frilled flowers are borne in long-stemmed sprays.

The 3 above, each: **Pkt. 15c; ½ oz. 40c.**

1846 **Fluffy Ruffles** The daintiest of flowers, the loveliest of colors—soft creamy-pink and wonderfully ruffled and frilled.

1906 **Ruffled Beauty** Silvery pink on an amber ground, with light making a constant play of color over the long-stemmed blooms.

1911 **Ruffled Orchid** Delicate orchid or lavender-pink, the color like that of big Orchids, with the flowers in graceful long-stemmed sprays.

1900 **Ruffled Rose** Pure, glowing rose. Their rich, warm color, their perfect ruffling and frills make them among the most beautiful of all.

The 4 above, each: **Pkt. 15c; ½ oz. 25c.**

1912 **Ruffled White** The outstanding white Sweet Pea, its gigantic blooms often carry five on each spray. Pure white, they are doubled, frilled and ruffled. **Pkt. 15c; ½ oz. 65c.**

5 Ruffled Sweet Peas

Besides the size of the flowers and their graceful ruffling, this collection charms those who grow it for color. The five soft shades blend exquisitely. There are: **Lady Ruffles**, pink; **Fluffy Ruffles**, creamy-pink; **Ruffled Beauty**, pink and amber; **Ruffled Orchid**, orchid; and **Ruffled Rose**, rose.

1814 **Burpee's Orange** Wherever the big clear orange Sweet Peas are displayed they win delighted admirers and arouse comment.

12 Magnificent Early-Flowering Sweet Peas

All the twelve varieties here described are included. This Collection with its many varieties and colors is remarkably low priced.
4169—12 pkts. (value $1.80)........**90c**

These Early-Flowering Sweet Peas were developed particularly for greenhouse culture. They bloom 3 to 4 weeks earlier than the others and so are preferable for planting during the Winter months in warmer climates, such as our Southern States. Though they come into bloom quickly in cool climates, the slower Summer-flowering varieties with their longer season of bloom are to be preferred for general outdoor planting. If the late Sweet Peas have not done well for you, try these.

1844 Mixture
Early-Flowering Sweet Peas

A mixture carefully made to give a harmonious color effect. Use it for the greenhouse, for outdoors in the South, and for outdoors too in the North where summers are short and cool. **Pkt. 15c; ½ oz. 25c; oz. 35c.**

1826 **Chevalier** Usually there are four flowers on each stem. Chevalier is pure rose, with a slight touch of lemon, and it turns to rose-pink. A variety famous for its clear, rich color.

1816 **Early King** Compelling bright crimson, it is bold in color and form.

1815 **Gilda Gray** Superbly showy with its pink standard backed by wings of salmon-cerise. The flowers are large, and they are freely borne.

1827 **Illumination** Another variety conspicuous for its color—Illumination is salmon-cerise, vivid and bright. There are other Sweet Peas with this coloring, but this variety ranks as the best.

1833 **Mrs. Calvin Coolidge** Bright but delicate in coloring, the large wavy flowers have just a tint of orange suffusing through their delicate salmon-pinkness. As charming as the lovely lady for whom it was named.

1834 **Mrs. Kerr** This pure rich salmon Sweet Pea is a favorite with everyone. Its blooms are large and handsomely waved.

1837 **Pink Profusion** The best Early-Flowering Sweet Peas only are offered here, and this very choice variety is rose-pink on white.

1838 **Snowstorm, Improved** Large blooms of pure waxy white. They are elegantly displayed on their long strong stems. White always helps in displaying other colors to best advantage. (White seeded.)

1841 **Sunburst, Improved** Each flower is a blend of color. There is a suffusion of bright pink through the creamy-pink ground while amber shading about the petal edges adds further charm.

Dahlia-Flowered Zinnias

Large, Massive Blooms The Most Beautiful of All

The blooms are very large, often 5 inches across (sometimes more) and thick (2 in.) through, like Dahlias. The plants are 3 ft. tall: sturdy, well-branched bushes, the vivid flowers held on long stems above the foliage. Most perfect in form, the Dahlia-Flowered Zinnias come in those definite bright and vivid colors which the thick, shingle-petalled Zinnia form best displays.

Grow Better Zinnias

Zinnias are so easily grown that they will come up and bloom almost anywhere. They prefer a sunny place with good drainage. Large Zinnias should be set 2 ft. or more apart, small ones about 1 ft. to permit air circulation about them. For better Zinnias, work well-rotted manure into the soil about 6 in. from the plants. Cultivate well, and water freely.

2056 **Buttercup** Light yellow, a rich creamy color. The big flowers hold their color well, are beautiful with Dream.

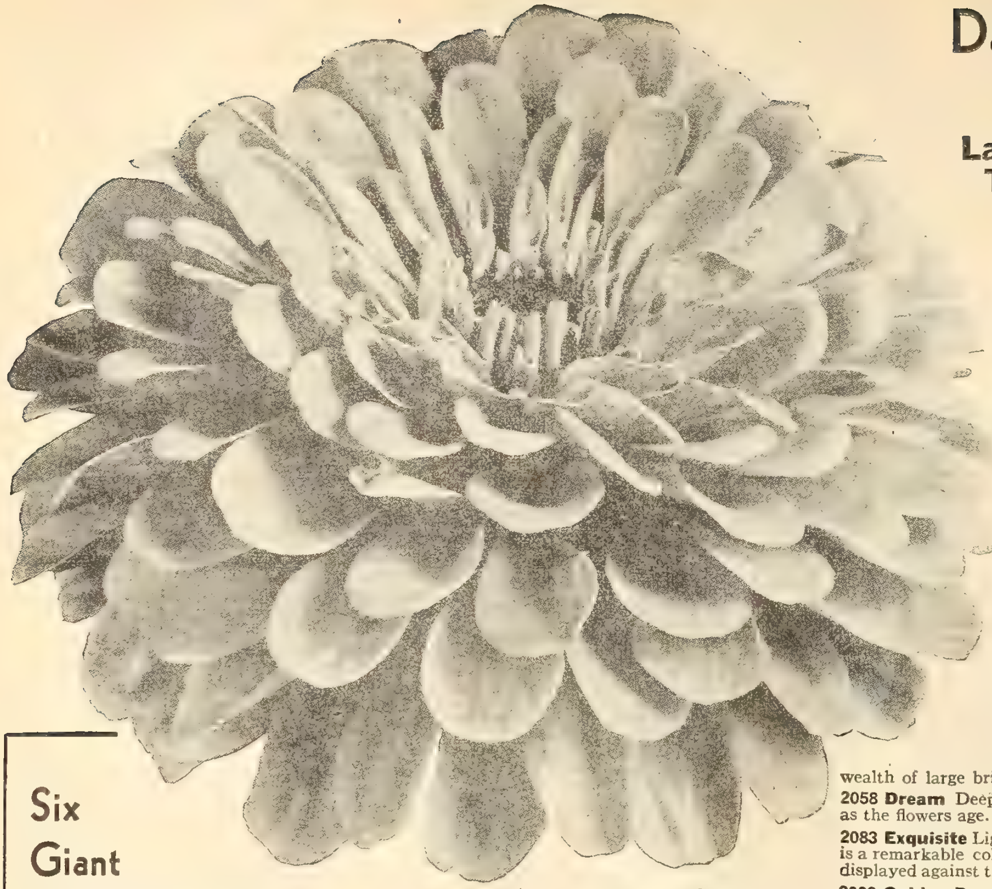
2071 **Canary Bird** Primrose-yellow, the color varying as the flower matures.

2055 **Crimson Monarch** Rich, warm crimson-scarlet. This Zinnia with its wealth of large bright blooms, is wonderfully popular.

2058 **Dream** Deep lilac-lavender that changes to purple as the flowers age.

2083 **Exquisite** Light rose, the center deeper in color. This is a remarkable color, the vividness of which is perfectly displayed against the greenness of the foliage.

2062 **Golden Dawn** Golden yellow. The color deepens almost to orange in the newly opened blooms.



Crimson Monarch

2057 **Illumination** No other name could so well describe this vivid, luminous color. It is a splendid rich rose shade.

2067 **Luminosa** Bright deep pink over which there is a light suffusion of salmon making Luminosa as beautiful a flower as may be desired. Free-flowering, long stemmed.

2072 **Meteor** The darkest red of all—rich, deep, and glowing. The color is so deep and so novel that Meteor is often grown just to provide cut flowers.

2068 **Old Gold** From pinkish old gold to deep burnished color, there are varying gold shades in a row of this variety. Unusual and very desirable in color and form.

Six Giant Dahlia-Flowered Zinnias—*(See Inside Back Cover)*

While everyone of the six Zinnias in this Collection is by itself beautiful, the combination of them together is unsurpassed. There are Canary Bird, Oriole, Exquisite, Dream, Polar Bear, and Crimson Monarch. All of them are large, with the thick form and overlapping petals that have given these most superb of Zinnias the name, Dahlia-Flowered.

4197 One Pkt. each (90c if bought separately) for only..................	**35c**
4195 Two Pkts. each ($1.80 if bought separately) for only..................	**85c**
4198 ⅛ oz. each ($2.40 if bought separately) for only..................	**$1.75**

For color, for size of flowers, trueness to type, health and vigor, you cannot plant better than Maule's Zinnias.

2060 **Old Rose** Rose blending into ochre yellow. A soft, warm combination rare in flowers—but most desirable both for garden display and cutting.

2061 **Oriole** Bright glistening orange shaded with gold. A blooming plant, the huge flowers in contrast to the green foliage, is remarkably showy and vivid.

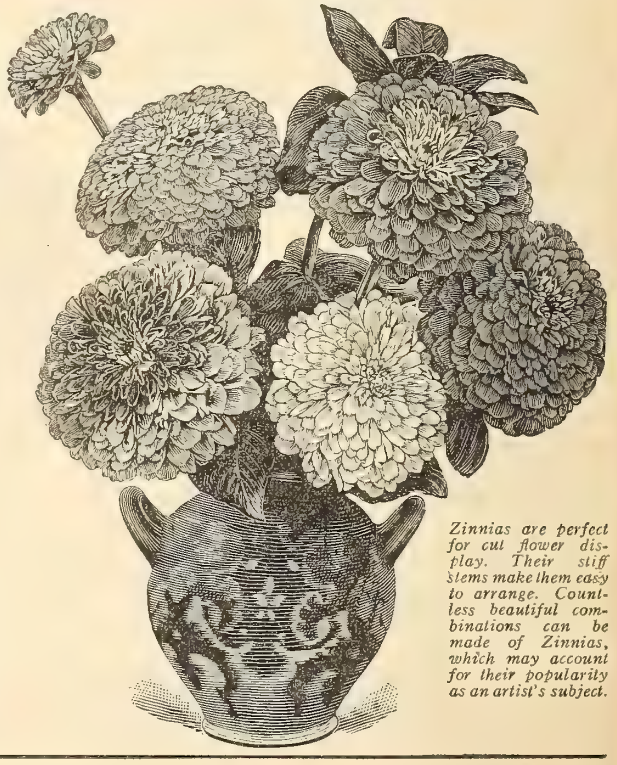
2063 **Polar Bear** Big white flowers. White Zinnias not only make interesting bouquets, but in combination with others, they lend accent, softening strong colors.

2073 **Scarlet Flame** Dazzling scarlet. The opening flowers are brightest orange-scarlet, becoming more intensely red as they mature. A compelling, triumphant color.

The Dahlia-Flowered Zinnias, separate colors, each:
Pkt. 15c; ⅛ oz. 40c; ¼ oz. 70c.

2065 Maule's Special Mixture of Dahlia-Flowered Zinnias

Knowing that many flower lovers with smaller gardens give preference to mixtures over separate colors, this mixture was prepared for them. It is a blend that cannot be outdone—a bed in full bloom is always a surprise and delight in richness of color and gorgeousness of bloom. All the colors described on this page are in the mixture in varying proportions to assure the most pleasing effect. Maule's Dahlia-Zinnia Mixture is justly famous. **Pkt. 10c; ⅛ oz. 40c; ¼ oz. 70c.**



Zinnias are perfect for cut flower display. Their stiff stems make them easy to arrange. Countless beautiful combinations can be made of Zinnias, which may account for their popularity as an artist's subject.

California Giant Zinnias

Tall Plants, Flat Flowers
Biggest Zinnias of All

Blooms that are often 5 to 6 in. across, as large and larger than the Dahlia-Flowered Zinnias. They are distinguished by the loosely-arranged petals, and the flat flowers, only 1 in. thick. The plants grow 3 ft. tall and are bushy, robust, and free-branching. From midsummer when the first flower opens, until frost, there is a profusion of bloom.

2037 **Brightness** Bright, deep rose.

2090 **Cerise Queen** Vivid cerise-rose.

2091 **Enchantress** Light rose with darker center.

2038 **Grenadier** Rich glowing ruby-red.

2039 **Lavender Gem** Lavender, shading to purple.

2043 **Lemon Queen** (*Golden Queen*) Lemon-yellow with golden cast.

2053 **Orange King** Radiant orange-scarlet.

2092 **Purity** White with creamy center.

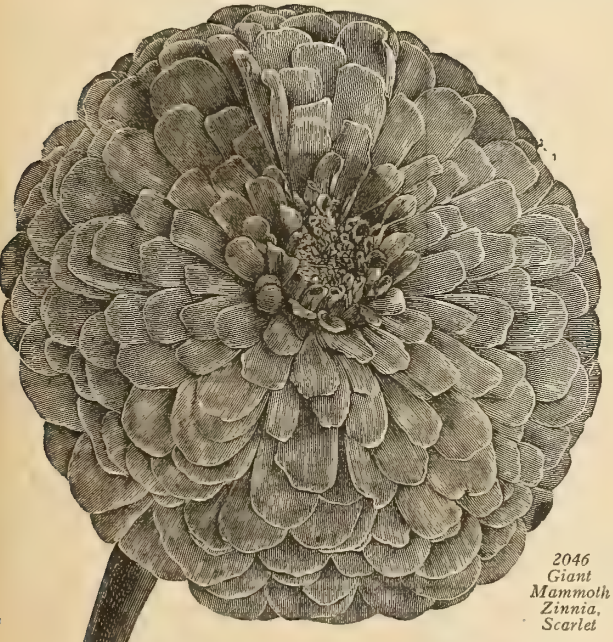
2054 California Giants, Mixed Colors

Rich and vivid colors predominate in the California Giants so that the effect created by them in mixture is not unlike a rare exotic oriental rug. The color assortment is so remarkable that we urge planting of this unequalled mixture by those who particularly like the more deeply colored Zinnias. Other colors as well as those described at the left are included. **Pkt. 15c; ⅛ oz. 30c; ¼ oz. 45c.**



2046 Giant Mammoth Zinnia, Scarlet

Maule's Giant Mammoth Zinnias

Not the largest Zinnias, these are among the most satisfactory of all. The double flowers with shingle-like petals average 4 to 5 in. across and 2½ in. in depth. These blooms, large, without being giant, are just right for making bouquets, which with their rich and intense colors, helps explain the Giant Mammoth's great popularity. The strong, erect plants grow 2½ to 3 ft. tall.

2041 **Burnt Orange**
2051 **Canary-Yellow**
2042 **Crimson**
2047 **Deep Flesh-Pink**

Picotee Zinnias

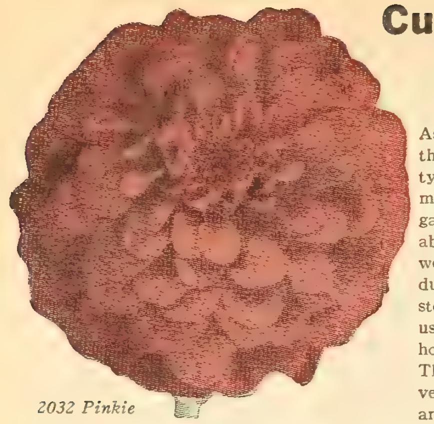
2070 **Many Colors, Mixed** The flowers are medium size, about 3 in. across, and in desirable, mostly pastel colors. Most of them have petals tipped or edged in a darker shade. Some of them have petals slightly cut, scallop-fashion, at the tips. The lovely Picotee Zinnias grow on plants 2 to 2½ ft. tall. **Pkt. 10c; ⅛ oz. 30c.**

Curled and Crested Zinnias

2036 **Colors in Mixture** The petals are curled back into almost tubular form, and they are bent and twisted to make the most artistically formed and among the most interesting of Zinnias. There are many colors, the 3½ in. blooms showing varying degrees of curling. The plants are 2 ft. tall. **Pkt. 5c; ¼ oz. 25c.**

There is great difference in Zinnias. Plant Maule's and you will be sure to grow the very best.

Cut-and-Come Again Zinnias



2032 Pinkie

As fast as you cut the flowers there are more. Not a new type of Zinnia, it is the type most common in old-fashioned gardens. The flowers measure about 2½ in. across and are well-rounded and freely produced. Their size and long stems make them exceedingly useful for cutting for both home gardener and florist. The Cut-and-Come Again are very uniform not only in size and shape of flowers but in the compact, branching 2 ft. high plants as well.

2027 **Bright Scarlet** The flowering plants are a blaze of color.

2028 **Canary-Yellow** Fine to cut.

2029 **Crimson** Highlights of scarlet.

2030 **Flesh-Pink** Delicate pink.

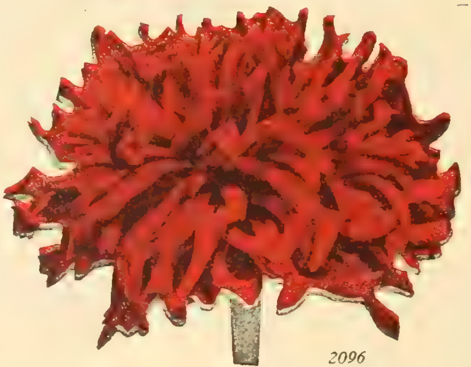
New—Fantasy Zinnia



2096 Fantasy

2096 **Mixed Colors** New last year, this Zinnia with its graceful rounded flowers was prized by all who planted it. With narrow, almost quilled petals, the medium-size, long-stemmed flowers are most artistic in form, and just the right size to make fine cut flowers. There are red and orange, pastel pinks, lavender and cream. Free-flowering plants. 2 to 2½ ft. tall. **Pkt. 25c; ⅛ oz. 70c; ¼ oz. $1.25.**

Burbank's Pastel-Colored

2099 **Giant Mixed Pastel Shades** Very large blooms with long stems. There are the prettiest light colors: coral, apricot, pale yellow, ivory, peach, orange-gold, old-rose and many others. These unusual and pastel colors are very beautiful when blended together as a planting of this mixture will prove. **Pkt. 20c; 2 pkts. 35c.**

2097 New Scabiosa-Flowered Zinnias

Medium-sized flowers, 2½ to 3 in. across, their thick cushion-like crested centers surrounded by a ring of broad ray petals so that they look most like Scabiosas. Rose, orange, and yellow shades predominate. The bushy plants are 24 to 30 in. tall. This new Zinnia is certain to be much more widely planted as it becomes better known. **Pkt. 15c; ⅛ oz. 30c.**

2098 Miniature or Double Mexicana Zinnias

Mexicana Zinnias have been known and planted for a long time but, even today, they are not in as many gardens nor are they as well known and appreciated as they deserve. Entirely different, the double, mostly two-toned, 1 to 1½ in. wide flowers are in orange, yellows and browns. The plants have fine pointed leaves and small stems. Ideal for planting in borders, beds, or for cut flowers. 12 to 18 in. tall. **Pkt. 10c; ¼ oz. 45c.**

Lilliput Zinnias

Double Baby or Pompon Zinnias

There is something appealing about the little Pompons. Having once planted them, gardeners always seem to include these little Zinnias in their next season's garden. While the plants are attractive, it is as cut flowers that the Lilliputs have won honors. The little conical heads, only an inch or so across, are an inlay of tiny petals. The colors are the best and gayest of all. Not only do they make fine show when cut, but they are very long-lasting. The plants average 12 to 18 in. in height.

2082 **Canary-Yellow** Clear, soft shade.

2074 **Crimson Gem** Bright and cheerful.

2075 **Flesh** Soft and delicate light pink.

2077 **Golden Gem** Orange-gold.

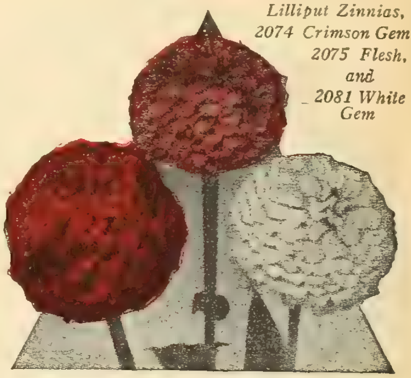
2078 **Lilac Gem** Soft lilac-lavender.

2079 **Rosebud** Fresh glistening rose-pink.

2080 **Salmon-Rose** Perfect in color.

2081 **White Gem** Pretty in combination, or bouquets of white alone.

The Lilliput Zinnias, any separate color:
Pkt. 10c; ¼ oz. 35c.



Lilliput Zinnias, 2074 Crimson Gem, 2075 Flesh, and 2081 White Gem

2076 Lilliput Zinnias Mixture of All Colors

These "baby" flowers, perfect likenesses in all details of the big double Zinnias, have real appeal. With the colors in mixture and the consequent blend and contrast, their charm may perhaps be best appreciated. Grow this for display as well as for bouquets. **Pkt. 10c; ¼ oz. 30c; ½ oz. 50c.**
